

Hubbard Feeds StressGuard Starter Pack

Weaning, transportation and transfer to feedlots are major sources of stress for young cattle. The StressGuard Starter Pack is designed to ease these transitions by maximizing dry matter intake and providing critical nutrients, so cattle reach full feed quickly, safely and profitably.

Electrolyte balance:

Incoming feedlot cattle typically have lost body fluids. StressGuard Starter contains high levels of electrolytes, especially potassium, to aid in rehydration.

Organic trace mineral fortification:

StressGuard Starters are highly fortified with trace minerals, including organic zinc, copper, manganese and cobalt, to support disease resistance.

Chromium:

In a Texas Tech University study, chromium propionate increased ADG and improved feed efficiency when fed during the receiving period.

Yeast culture:

Yeast culture is added to enhance rumen microbial growth and stabilize the rumen environment.

Choice of additives:

Proper use of additives can improve animal performance. StressGuard Starter Pack is available with approved feed additives.

Includes these proven Alltech technologies:

YEA-SACC® Extra — Get more nutrients out of forage. Helps stimulate growth of fiber-digesting bacteria in the rumen, increasing the rate and extent of forage breakdown.

BIOPLEX® Hi-4 — Better absorbed, stored and utilized by the animal than inorganic mineral sources which reinforces mineral status, leading to optimal overall health, immune status and reproductive function in the animal.

SEL-PLEX® — Supported by more than 20 years of research, SEL-PLEX is the most proven and only FDA reviewed form of organic selenium.

HUBBARD FEEDS

111 W. Cherry Street, Suite 500

Mankato, MN 56001

Net Weight 50 lb (22.68 kg) or bulk invoice.

Feedlot receiving: On the second day after cattle have arrived at the feedlot, introduce StressGuard Starter Pack at 0.1% of body weight, along with a standard concentrate and free-choice hay (0.5 lb. of StressGuard Starter Pack per head per day for 500-lb. calves). By the third day after arrival, offer StressGuard Starter Pack at 0.1% of body weight, along with a standard concentrate, grain and roughage in a complete starter ration.

Weaning: StressGuard Starter Pack may also be used as a weaning supplement. Offer StressGuard Starter Pack at 0.1% of body weight (0.5 lb./head/day for 500-lb. calves), along with creep feed and pasture, to nursing calves up to 30 days before weaning.
