

HUBBARD TESTIMONIAL

STRESSGUARD & INTEGRAL A+

"After testing our feed quality using Alltech's 37+ test, and having a group sell 100 pounds lighter than originally predicted we knew there needed to be a change in how we feed our cattle.

OUR CATTLE CONSISTENTLY HAD LOW INTAKES EXCEPT FOR THE GROUP FED HUBBARD FEED'S STRESSGUARD. THOSE CATTLE HAD HIGH INTAKES ALONG WITH BETTER GAINS. WE STARTED TO INCORPORATE IN A COUPLE OF MORE PENS AND WERE SEEING EVEN MORE POSITIVE RESULTS.

Now all of our cattle on feed have Integral A+ incorporated into their rations."
