

WE'RE BACK...AT EVENTS!

THANKS TO THOSE THAT STOPPED BY OUR BOOTH AT WORLD PORK EXPO

It's been more than 18 months since we've been at a large event with our Hubbard team! We were very excited to get back to a live event and World Pork Expo didn't disappoint!

Our eye-catching swine display served as a backdrop for interviews/reports from CNBC, RFD TV and Agweek. Each day, multiple people came to the booth and asked if they could take their picture in front of the 'Hubbard pig'.

Attendance was very strong Wednesday and Thursday and our swine team had the opportunity to visit with a number of key customers and prospects. The general consensus on the tradeshow floor was that everyone was excited to be back at the World Pork Expo and happy to see their friends in the industry.

We look forward to seeing more people at our upcoming shows and events in the next several months!

Hubbard Swine Research *Appetite for Innovation*

Hubbard Feeds has a long history of providing research-based nutritional products and innovative support services. We are driven to provide our customers with products and answers that will improve their profitability, increase their competitive advantage, reduce their risk and simplify their lives.

Our swine research program includes three facilities that have the capacity to house 11,000 nursery pigs on trial at one time. Annually, 50,000 pigs are involved in Hubbard research evaluations. Our research priorities include work on gut health, amino acids, enzymes and nursery proteins.

Hubbard's Swine Research Facilities

Leavenworth Livestock Research Center (LLRC) Sleepy Eye, Minnesota

- Wean-to-finish barn with two 1,250-head rooms with 48 pens each.
- Innovative feed technology with the Big Dutchman DryExact feeding system.
- Fully featured ventilation system using both positive and negative pressure.
- Each pen has four water lines to evaluate specific water additives.

Leavenworth Livestock Research Center 2 (LLRC2) Sleepy Eye, Minnesota

- Nursery barn has two 2,700-head rooms with 72 test pens each for a total of 144 test pens and overall capacity of 5,400 nursery pigs.
- Utilizes Big Dutchman DryExact feeding system.
- Four water lines for each pen to evaluate water additives.
- Unique rail with winch scale for weighing feeder plus feed for accurately determining feed intake.

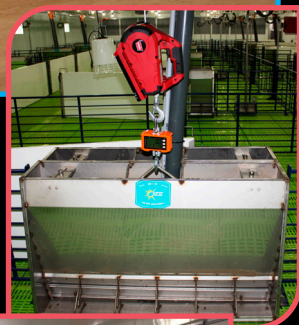

Buffalo Center, Iowa

- Nursery barn has a 1,000-head capacity that allows for six treatments per trial.
- Water system allows for two water treatment evaluations.

At Hubbard Feeds, our mission is to combine the resources of Alltech, an innovative, science-based global company, with our on-farm presence and technical expertise to help our customers reach their goals.

LESSEned SEVERITY OF SCOURS

JIM SCHMITT

Blueprint®

JIM SCHMITT

"We were struggling a lot with losing calves to scours. We wanted to lessen the severity of our scours and have fewer impacted days. When we started on the Blueprint® Milk Replacer, there was a noticeable difference in our calves instantly. The product was easy to mix, and the calves seem to really like the taste of it."

-Jim Schmitt
