AgraSphere®

TREAT DEEP PITS *Naturally*

SAFE, ALL-NATURAL, AND BIODEGRADABLE

ATTRIBUTES

- Activates, treats, and maintains
- Liquefies suspended solids and sludge
- Liquefies manure for conditions not suitable for insect larva
- Easy to use, no mixing required
- Patented, 24/7 time release
- Maintains nutrient values
- Two applications per year
- Works at the bottom, where problems occur
- Biodegradable, corn-based resin dispenser
- Cost effective

WHEN TO USE

- Need to reduce sludge layer
- To improve deep pit storage capacity
- To help prevent crusting and foaming
- To increase nutrient value and consistency
- To reduce odor
- Along with Activator PLUS®
- To make pumping easier

DIRECTIONS

SELECT DOSAGE

Each AgraSphere® treats up to 75,000 gallons

Swine Nursery, Grower, Finisher

Deep pits with less than 12 inches of retained bottom sludge

- Add 1 AgraSphere for every 200 grower/finisher pig spaces

Example: 400 head requires 2 AgraSpheres

- Repeat every 180 days

Deep pits with more than 12 inches of retained bottom sludge

- Add 1 AgraSphere for every 200 grower/finisher pig spaces

Example: 400 head requires 2 AgraSpheres

- Repeat every 90-120 days
- Once depth reaches less than 12 inches, repeat every 180 days

Swine Farrowing, Gestation, Breeding

- Add 1 AgraSphere for every 80 head

Example: 160 head requires 2 AgraSpheres

- Repeat every 180 days

Crusted Systems

- Do NOT add when firm, heavy crust has accumulated
- Treat with Activator PLUS prior to using AgraSpheres
- Add AgraSpheres once crust has been liquefied

Beef

- Speak with your Healthy Farms™ consultant

TREAT

Always treat to the maximum capacity

Place evenly throughout system

Repeat every 90-180 days, depending on sludge depth
