

HUBBARD FEEDS OPTICARE SPOTLIGHT

FINISHER

Assist (45301)

Assist is a combination of yeast culture product and copper chloride designed to be used in grow-finish pigs from when pigs enter the barn until they are marketed to promote gut health and average daily gain.

Directions for Use: Assist should be mixed at the rate of 2 lbs per complete ton of feed. It can be fed from 50 lbs of bodyweight until market. See product information sheet for use with DesignRite Booster (#33640).

OptiRemedy (80C2)

A stable source of the blended, broad spectrum, essential oils of oregano, thyme, cinnamon, capsicum and citrus fruit extract.

OptiRemedy provides the following benefits:

- Reduces harmful bacteria
- Increases the beneficial micro-flora
- Lowers pig mortality
- Improves average daily gain and feed efficiency

Directions for Use: Mix Opti-Remedy at the rate of 2 pounds per ton of complete swine feed.

Opti-Pak® Efficiency (80A2)

A nutrition fortification pack designed for the last 40-50 days before market in finishing hogs. Opti-Pak Efficiency helps improve the digestibility of the diet. The fortification in Opti-Pak Efficiency also helps improve average daily gain and feed conversion. Opti-Pak Efficiency can be used alone or in combination with Paylean®. (*Paylean® is a registered trademark of Elanco Animal Health*)

Directions for Use: Use 5 pounds of Opti-Pak Efficiency per complete ton of feed for the last 80-100 pounds of gain.

Citralin™ (8321)

A combination of inulin and citric acid formulated to help maintain the balance of the digestive system during off-feed periods such as postweaning or extreme diet changes.

Directions for Use: Mix 2 level scoops (1 lb) Citralin per one gallon of stock solution. Meter 1 gallon of stock solution at the rate of 1 oz per gallon (1:128 delivery) of drinking water to provide 1 to 2 grams per head per day of inulin.

AgraSphere (35474)

The AgraSphere is designed to reduce sludge build-up, prevent crusting, reduce flies and odor through a patented time-released technology that provides 24/7 continuous activation in the biodegradable sphere.

Directions for Use: For grower and finisher barns use 1 AgraSphere for every 200 grower/finisher spaces. Repeat in 180 days.

Activator Plus (35473)

Activator Plus should be mixed with water and applied to heavily crusted areas. It is designed for fast activation of solid waste breakdown and reduction of gas, foaming and odors.

Directions for Use: For each 1000 head grow-finish barn or 400,000 gallons of storage capacity apply 100 pounds of Activator Plus with three treatment periods. Apply 50 pounds on the first treatment and 25 pound for each of the additional two treatments during the year. Activator Plus is the product of choice in pull-plug/flush systems.

AgraSlat (45020)

The AgraSlat is designed to reduce sludge build-up, prevent crusting and liquefy slurry in systems with limited access. Its slim profile fits through slats and it works where there is no access point for the AgraSphere.

Directions for Use: For nursery grower and finisher barns use 2 AgraSlats for every 200 hd. Repeat in 180 days.
